

10 - 52 - 4

FISH POND FERTILIZER

Professional Water Soluble Plant Food

Guaranteed Analysis

Total Nitrogen(N)	10%
Ammoniacal Nitrogen	10.00%
Available Phosphate (P2O5)	52%
Soluble Potash (K2O)	4%

Derived from: Ammonium Phosphate and Potassium Sulfate.

Maximum Solubility = 3.25 lbs. per gal. The use of hot/warm water, along with agitation will increase solubility.

NET WEIGHT: 25 LBS.

P.F.I. 10-52-4 "Fish Pond Fertilizer" is a premium grade, HIGH PHOSPHATE, water soluble fertilizer that fertilizes the phytoplankton bloom in a pond. This product feeds the microorganisms (such as phytoplankton, filamentous, chara, and nitella) which are the continual food source for the aquatic insects and small fish in your pond.

NOTICE:

Seller warrants that the product conforms to it's chemical description and is reasonably fit for the purpose stated on this label when used in accordance with directions under normal conditions or use. Since weather, crop, soil, and other conditions may vary, Plant Foods, Inc. and the seller make NO WARRANTY of any kind, expressed or implied, concerning the use of this product. The user assumes all risks of use and handling whether or not in accordance with directions or suggestions for use.

Manufactured by: Plant Foods, Inc.
PO Box 1089 Vero Beach, FL 32967

F572

GENERAL DIRECTIONS FOR USE:

Dissolve 5 lbs. per surface acre when the water temperature is between 60-65 degrees F which is usually during the early to mid Spring. Repeat this application every 10-14 days until the phytoplankton bloom is established.

Once the phytoplankton bloom is established, apply 5 lbs. per surface acre every 30 days to maintain the bloom.

NOTE: These rates may or may not meet the growers and or crops needs. Weather conditions, air temp., water temp., and water pH will affect a grower's rates and fertilizer requirements.
