Derived from: Potassium Nitrate, Ammonium Phosphate Ammonium Nitrate, Boric Acid, Copper EDTA, Iron EDTA, Iron EDDHA, Manganese Sulfate, Manganese EDTA, Sodium Molybdate, and Zinc EDTA.

P.F.I. 20-10-20 is a premium grade, water soluble fertilizer that is ideal when growing in a soilless medium and/or for continuous liquid feed programs. It is formulated as a Greenhouse Grade soluble, where high Nitrate (N) and high Potassium (K) are needed to promote vibrant color and desired growth.

P.F.I. 20-10-20 water soluble fertilizer is fortified with the essential micronutrients (including Fe EDDHA) to ensure healthy crops and increased yields, and is safe on all plants when used as directed.

GENERAL DIRECTIONS FOR USE:

Dissolve 5 lbs. of concentrate per 100 gal. of water. 5 lbs. per 100 gal. should cover 1 acre. For 1:100 ratio, use approx. 1 lb. per gal. of concentrate to equal 200 ppm (N).

DIRECTIONS FOR USE ON SPECIFIC CROPS:

PLUGS: Feed at 50-100 ppm (N) every 7 days. The amount of desired (N) may depend on the growth stage of the plug.

VEGETABLES, TRANSPLANTS, BEDDING PLANTS: Feed at 100-200 ppm (N) for constant feeding, and 200-400 ppm (N) for pulse feeding every 7-10 days.

GREENHOUSE / NURSERY: 5-10 lbs. per 100 gal. of water per acre on plants, trees, ALL Palm varieties, shrubs, and flowering vines.

****NOTE**** For Transplant slurry, add 1/4 lb. per 3 gal. bucket of puddled soil.

ROW CROPS: Use 5-10 lbs. per 100 gals. per acre. Apply every 10-14 days.

NOTICE:

Seller warrants that the product conforms to its chemical description and is reasonably fit for the purpose stated on this label when used in accordance with directions under normal condition or use. Since weather, crop, soil, and other conditions may vary, Plant Foods, Inc. and seller make NO WARRANTY of any kind, expressed or implied, concerning the use of this product. The user assumes all risks of use and handling whether or not in accordance with directions or suggestions for use.

Manufactured by: Plant Foods, Inc.
PO Box 1089 Vero Beach, FL 32967

CONVERSIONS: 5 lbs. per acre = 5 Kilos per HECTAR. 1 lb. = 2 cups.
1 oz. = 2 TBSP. 1 TBSP per gal. of water = 3 lbs. per 100 gal. of water.

Maximum Solubility = 3 lbs. per gal. The use of hot/warm water, along with agitation will increase solubility.

Potential Acidity = 404 lbs. calcium carbonate equivalent per ton

Conductivity of 100 ppm N = 0.62 mmhos/cm

150 ppm N = 0.93 mmhos/cm

200 ppm N = 1.24 mmhos/cm

NET WEIGHT: 25 LBS.
