

Fundraising with Bizzy B's

Why fundraise with Bizzy B's Recycling?

It's easy, it's convenient, and it's green. We offer two different forms of fundraising that allow your organization to earn money while encouraging a convenient way for friends and neighbors to get rid of their "junk." With our two distinctive branches of fundraising it is easy to find a program that is right for your organization.

What are types of fundraising does Bizzy B's Recycling offer?

There are two types of fundraising available: Off-Site Metal Drives and On-site Metal Drives.

Off-Site Metal Drives

With this option Bizzy B's would drop a roll-off at a location designated by your organization for 3-7 days. During this time you fill the roll-off with steel and then it is picked-up, weighed, and we cut your organization a check. This drive provides a way for your organization to help your community clean-up while also helping your cause, in a short time. It has been our experience that most people have large items that they want to get rid of but don't know are recyclable.

*Tip: Make sure you have people who are physically able to load and unload metal. This can increase participation of people who would not be able to bring the metal to you. PDF flyers for metal drives are available upon request.

On-Site Metal Drives

On-Site Metal Drives provide your organization with the option of a fundraiser that lasts a short time or all year round. After setting up an account with Bizzy B's Recycling and designating the time period your fundraiser will take place for all that is left is you to get the word out.

Customers then come into our yard and recycle their metal. At the register they simply state that they would like to donate their ticket to your organization and it is added to your account.

With this option people can donate all different types of metal as they accumulate it.

*Tip: If your organization opts to do a longer fundraising period it may become necessary to remind people over the course of the event.

How to get started?

1. Choose an option: Off-Site Metal Drive or On-Site Metal Drive
2. Pick a date
3. Give us a call at 720-435-0489 to set up the rest
