Fax: (514) 382-8249

**Test : Antimicrobial effectiveness of Sani Sport machine against
different mold and yeast strains**

Register No.:140107

Requisition No.: 1407

Bacterial strains	Specifications	Results per swab (CFU*/ml)		Antimicrobial effectiveness of reduction (%)	Procedure s
		Before treatment	After treatment		
1. <i>Candida albicans</i>	Reported	56 000	24	99.96	BMS
2. <i>Candida proteome</i>	Reported	46 000	20	99.96	BMS
3. <i>Leucopathia acquisita</i>	Reported	20 000	12	99.94	BMS
4. <i>Pityriasis versicolor</i>	Reported	15 000	10	99.93	BMS
5. <i>Aspergillus niger</i>	Reported	18 000	2	99.98	BMS
6. <i>Rhyzopus spp.</i>	Reported	20 000	2	99.99	BMS

Test : Antimicrobial effectiveness of Sani Sport machine against different viruses	Register No.:140107 Requisition No.: 1407
---	--

Bacterial strains	Specifications	Number of infected cells/ml of cell culture		Antimicrobial effectiveness	Procedures
		Before treatment	After treatment		
1. <i>Entero-70</i>	Reported	20 000	0	100 %	BMS
2. <i>Influenza virus</i>	Reported	18 000	0	100%	BMS

Test : Total molds and yeasts count	Register No.:140107 Requisition No.: 1407
--	--

Samples (Hockey equipments)	Specifications	Results per swab (CFU*/50 inch ²)		Antimicrobial effectiveness of reduction (%)	Procedures
		Before treatment	After treatment		
1. Gloves (inside)	Reported	1800	< 10	> 99.44	BMS
2. Gloves (outside)	Reported	480	< 10	> 97.92	BMS
3. Helmet (inside)	Reported	550	< 10	> 98.18	BMS
4. Helmet (outside)	Reported	500	< 10	> 98.00	BMS
5. Elbow Pads(inside)	Reported	1 500	< 10	> 99.33	BMS
6. Shin Pads (inside)	Reported	2 400	< 10	> 99.58	BMS
7. Chest Protector (inside)	Reported	2 500	< 10	> 99.60	BMS
