

MAKING THE IMPOSSIBLE POSSIBLE

INFINITO RESOURCES

Why Us?

We are an independent, global resource firm headquartered in North Carolina, providing our clients the knowledge, support and reach they need to grow and create wealth.

Since 1996 our seasoned dealmakers have collectively closed over 500 transactions in more than 30 industries.

When you choose to work with Infinito Resources, you're working with a diversified experienced group who is fair, knowledgeable and committed to making the impossible possible on your behalf. **It's our Promise.**

Business Development,

Concerned about; Discouraged Leadership, Lack of Sales, Client Erosion, Production Down, Diminishing Profits, No Cash, No Time for Yourself or for Your Family? Infinito Resources provides experiential knowledge and support to those who want and need to overcome business challenges.

Real Estate, Infinito represents our clients in targeting specific homes or properties that match their purchasing criteria. We identify potential investment properties, perform the due diligence required to evaluate the development allowances of the property with certainty, and puts an elite development team of architects, engineers and contractors together for a successful and efficient project.

Trading Commodities, we offer investors an opportunity to diversify their holdings away from the traditional asset classes such as shares and bonds. We seek qualified equity investors, and sellers necessary to satisfy the commodity transaction needs of others.

Mining, Infinito brings value to mining clients assay and geological services, equipment and equity services to support new mine engineering and development, expansion and remediation services. Our groups expertise in engineering and design helps our clients meet their development, production and efficiency targets.

State-of-the-art and leading edge technology is used to asses geographical regions giving our clients the best possible insight as to what they can expect in making the decision to proceed or not.

Infinito brings value to mining clients assay and geological services, equipment and equity services to support new mine engineering and development, expansion and remediation services.

Our group's expertise in engineering and design helps our clients meet their development, production and efficiency targets.

OUR CLIENTS ROI

Our unit price is decided upon after vetting the validity and credibility of the seller and/or buyer, the commodity and its 3rd party certification, the due diligent process, history and prior business transactions and deliverables, even what are others are saying about the supplier and/or buyer. Then measured against current LSE prices, usually 20%+ less.

Collaborative effort, it's our availability and the response time to providing you the answers required to make forwarding decisions.

"A lack of transparency results in distrust and a deep sense of insecurity."

Dalai Lama.

Thank You...Pedro Carreno, President
