

Cold-Mount® Price List

Cold-Mount Laminators

Effective February 1, 2005

This price list contains pricing on Cold-Mount® Laminators. It lists prices for motorized presses, hand operated presses and roll feed attachments. The roller gap can be adjusted up to 2" wide.

Cold-Mount® Motorized Laminators

Coda's motorized laminators are available in 5 different widths. Power requirements are 110 v AC, 1 amp. All electrical components are modular. They all plug in to each other, making field service a snap. Any part of the electrical system can be changed out without rewiring. We recommend a motorized machine for any significant amount of overlaminating.

PRODUCT BULLETIN

February, 2005

HEAVY DUTY ROLL FEEDS FOR COLD-MOUNT PRESSES

Coda, Inc. has introduced a new "Heavy Duty" roll feed attachment for its line of Cold-Mount table top laminators. This attachment provides an unwind bar to facilitate coating substrates with any of our Single Release adhesive materials. The attachment consists of two heavy brackets that attach to the base of the laminator and a new "Auto Lock" Feed Bar.

The Auto Lock Feed Bar is made from a custom aluminum extrusion with a special rubber cord threaded through it that automatically locks the roll on the bar in place. This makes for a simple chuck free, tool free method of mounting the adhesive roll.

The price table below includes costs for the entire attachment and the Auto Lock bar by itself.
