

Cold Mount System Price Sheet

Coda's Cold-Mount® System combines Coda's award-winning Cold-Mount® laminator with Coda's newly designed roll-feed and automatic scrap rewind. The unit comes on a sturdy floor stand with locking casters and storage space for roll materials. Available in 34", 44" and 54" widths, the Cold-Mount® System is easy to use and can be run by one operator. The Cold-Mount® System is an integrated production machine ready to be installed in any finishing department that has a requirement to mount and laminate using pressure sensitive materials. The Coda Cold-Mount® System is ideal for low-to-high volume production in a small-to-medium sized shop, or as an additional finishing station in a large shop where more expensive, high production machines are committed to very large runs or thermal lamination. The features on Coda's Cold-Mount® System are comparable to production machines requiring a higher investment of money and time.
